

Amazon **EC2 C5** Instances

Amazon EC2 C5 Instances

Designed to compute intensive workloads with the best price performance in Amazon EC2.

Amazon EC2 C5 instances are the next generation of the Amazon EC2 Compute Optimized instance family. C5 instances offer the lowest price per vCPU in the Amazon EC2 family and are ideal for running advanced compute-intensive workloads. This includes workloads such as high performance web servers, high-performance computing (HPC), batch processing, ad serving etc.
