AWS IoT Events

aws

AWS IoT Events

Easily detect and respond to events
from IoT sensors and applications

AWS IoT Events is a fully managed IoT service that makes it easy to detect and respond to events from IoT sensors and applications. Using AWS IoT Events, it's simple to detect events across thousands of IoT sensors sending different telemetry data, such as temperature from a freezer, humidity from respiratory equipment, and belt speed on a motor, and hundreds of equipment management applications. Using AWS IoT Events, it's simple to detect events across thousands of IoT sensors sending different telemetry data, such as temperature from a freezer, humidity from respiratory equipment, and belt speed on a motor, and hundreds of equipment management applications.
